Huynh Kim Cuong

Web & Mobile Developer

+84 792 191 402 | huynhkimcuong53@gmail.com | github.com/KimCuong142 | Ho Chi Minh City, Vietnam

Education

FPT University — Ho Chi Minh City, Vietnam
Bachelor of Science in Software Engineering — Current GPA: 3.25/4.0 — *Sep. 2022 – Sep. 2026*

Work Experience

Digital Era Total Solutions — Ho Chi Minh City, Vietnam
Front-end Developer Intern — *Jan. 2025 – Jan. 2026*

- **UI Implementation**: Developed responsive inventory tracking and asset-borrowing modules using React, TypeScript, and modern CSS architecture to ensure cross-device consistency.
- **API Integration & Performance**: Connected client-side interfaces with backend RESTful APIs, optimized state management, and streamlined complex item tracking tables to boost render performance.
- **Collaboration**: Partnered with design and backend teams to clarify specifications, debug edge cases, and enhance user experience across operational business modules.

Projects

HiMedi – Medication Reminder App [iOS | Android] — Oct. 2025 – Dec. 2025
Role: Product Owner & Full-stack Mobile Developer

- **Native Client Engineering**: Architected dual-platform native apps using Swift/SwiftUI (iOS) and Kotlin/Jetpack Compose (Android), adhering to MVVM and Repository patterns for clean modularity.
- **AI & OCR Pipeline**: Integrated Apple VisionKit and Google ML Kit with Gemini AI to extract text from prescription photos and automatically generate structured recurring reminder schedules.
- **Background Services & Local DB**: Built persistent storage via Core Data and Room Database; implemented background synchronization and interactive widgets via WidgetKit, Glance, and WorkManager.
- **Tech Stack**: Swift, Kotlin, SwiftUI, Jetpack Compose, Core Data, Room, WidgetKit, Glance, WorkManager, ML Kit, Gemini AI.

RES-Q SOS Platform — Dec. 2025 – May 2026
Role: Project Leader & Mobile Developer

- **Offline Mesh Networking**: Developed decentralized peer-to-peer messaging using Bridgefy SDK and Apple MultipeerConnectivity, allowing emergency SOS transmission without Internet connectivity.
- **Spatial & Map Features**: Integrated MapKit and Apple Nearby Interaction framework (Ultra-Wideband) to provide real-time GPS rescue tracking and high-precision spatial positioning for rescue volunteers.
- **Tech Stack**: Swift, SwiftUI, MapKit, Core Data, Bridgefy SDK, MultipeerConnectivity, Nearby Interaction (UWB).

HappyPaws – Pet Care & E-Commerce Platform — Sep. 2025 – Nov. 2025
Role: Project Leader & Front-end Web Developer

- **Modern Web Architecture**: Developed a full-featured e-commerce and booking application with Next.js (App Router), React, TypeScript, and Tailwind CSS, achieving high Lighthouse performance scores.
- **State & Real-time Integration**: Managed complex client cache with TanStack Query and Redux Toolkit; integrated Socket.IO for real-time customer support chat and Gemini AI-powered consultation.
- **Payment & Checkout**: Implemented multi-gateway payment flows (VNPay, MoMo) and dynamic shopping cart logic.
- **Tech Stack**: Next.js, React, TypeScript, Tailwind CSS, TanStack Query, Redux Toolkit, Socket.IO, Gemini API.

Technical Skills

Languages: TypeScript, JavaScript, Swift, Kotlin, Java, Python, HTML5, CSS3/Tailwind
Mobile Development: SwiftUI, Jetpack Compose, iOS/Android SDKs, Core Data, Room, WidgetKit, WorkManager
Web Development: React, Next.js, Redux Toolkit, TanStack Query, RESTful APIs, WebSockets, Responsive Design
Architecture & Patterns: MVVM, Repository Pattern, Clean Architecture, Component-Driven Development
Tools & Cloud: Git, GitHub, Firebase, CloudKit, Postman, Docker, Gemini API, Figma, Linux
Developer Productivity: Cursor, Claude, OpenAI CodeX, Perplexity, v0, Lovable
